

RELIGIOUS TOURISM

With the idea of religious cultural tourism, we want to propose a religious-tourist route, linked to the territory.

The estimate of religious tourist flows shows a strong and rapid increase from 2005 to 2019, years in which the number of visitors almost doubled.

The intention is to build an offer of religious-cultural tourism integrated with the paths of the "paths" in Puglia, to enhance the memory and conservation of religious works for cultural enjoyment and study; guarantee the public use of the public cultural heritage and / or the assets of local ecclesiastical bodies, while at the same time promoting employment: in fact the project involves the creation of a religious museum complex, with an integrated offer of tourist and cultural services that will allow the employment of vulnerable people.
